

# Com4IP- BX (Business Xchange)

## Com4IP and the gateway

The technological installation of the **Com4IP solution with a gateway** allows RDC Technologies to offer a complete telephony integration straight from its application. The users benefit from the technological synergy of the unified communication as well as phone management straight from their workstation. Furthermore, the solution offered by RDC Technologies will possibly allow the elimination of the PBX (Private Branch Exchange) by using

the phone functions included in the **Com4IP** integration.

The **Com4IP-BX product** (Business Xchange) offers users a profile and presence management in real time. The integration of these functions allows users to manage their defined profile (follow-me) according to their presence status. Here are the **Com4IP-BX product** components:

Com4IP – Client (workstation)	Com4IP-BX
<p>Integrates all your communications with simplicity and security.</p> <ul style="list-style-type: none"> <li>▪ Unified electronic messaging</li> <li>▪ Telephony <ul style="list-style-type: none"> <li>○ External access</li> <li>○ Profile</li> <li>○ Conference</li> <li>○ Transfer</li> <li>○ Call hold</li> <li>○ Vocal box</li> </ul> </li> </ul>	<p>Integrates the standard PBX into the IP network through the use of a gateway.</p> <ul style="list-style-type: none"> <li>▪ Voice-data convergence</li> <li>▪ Migration towards the IP telephony</li> <li>▪ Profiles Management</li> <li>▪ Call Management</li> <li>▪ Unifies communications</li> </ul>
