

Com4IP Client – Server

The current **Com4IP product** is a secure, unified communications and office productivity software solution which offers enterprises simple communication functionalities, in-house phone integration, office integration, fax integration, reliability while reducing acquisition, support, integration, maintenance and training costs.

Our solution allows clients to make branch office communications via the IP

telephony integrated into **Com4IP**.

With the Softphone client, integrated into **Com4IP**, the users are capable of communicating with co-workers of other offices via the enterprise's IP network. The Softphone client is also integrated with the **Com4IP** instant messaging functions thus allowing the users to notice, in real time, the presence status of the various co-workers of the other branch offices and/or staff travel, etc. Here are the components:

Com4IP – Client (workstation)	Com4IP- Server
<p>Integrates all your communications with simplicity and security.</p> <ul style="list-style-type: none"> ▪ IP Telephony ▪ E-mail and Voice mail ▪ Electronic messaging ▪ Fax ▪ Scan to E-mail ▪ Shared calendar ▪ Contacts Management global/private ▪ 448-bit encrypted and compressed communications (or according to the International Internet Regulation for your region.) ▪ Unified electronic messaging 	<p>Integrates all your communications under a single server.</p> <ul style="list-style-type: none"> ▪ IP Connection ▪ Presences Management ▪ Security ▪ Fax Server ▪ Line on PSTN ▪ Supported POP3 / SMTP Mail servers among others: <ul style="list-style-type: none"> ○ Exchange ○ Groupe Wise ○ Notes ○ Suppliers ○ Etc.
